Home: 101 rue du Chapelain, 7800 Ath

Birthdate: March 14th 1990 (23 years old)

EXPERIENCE

February 2013 until now – Microsoft Innovation Center – Internship student

I'm creating a software application in C#/.NET/WPF for Stoquart SA that checks several translation rules in bilingual files in order to avoid most of human mistakes.

2011 to 2012 – Hello Agency – Software developer (student job)

I wrote the core of Dataedit 3 and several of its base modules. It is a PHP/Drupal web application that allows companies to manage their marketing communication, products and sales.

August 2010 – Belgacom SA – Network technician (student job)

As part of the « Network Operation Center » team, my work was to monitor the Belgian mobile phone network, to perform remote repair and to dispatch on-site technicians when needed.

July 2009 – Ipalle IC – Worker (student job)

My work was to manage and maintain the Ipalle recycling park of Ath and to advice the customers.

EDUCATION

2011 – 2013: BS « Informatics & systems » at Haute Ecole de Louvain en Hainaut site « Don Bosco »

Those years allowed me to develop a more pragmatic approach of informatics and to reinforce my skills in development and project management.

2009 – 2011: BS « Computer science » at Université Catholique de Louvain with options in biology and physics.

I used this time to deepen my knowledge of informatics, mathematics and economics. I also took biology and physics courses.

2007 – 2009: BS « Civil engineering » at Université Catholique de Louvain

Those two years taught me to work effectively in a team, to manage projects, organize my work and to be polyvalent in various science domains.

2001 – 2007: School with mathematics & sciences options at Collège St Julien Ath

Since very young, I have been interested in science and technologies. I also discovered programming during this time.
